SHIPPING OPTIONS / ** New prices for 2022:

Add Lift-gate: \$125.00

Add Inside Delivery: \$150.00

Pricing Shown in CAD Dollars and Includes: choice of standard stain, art set-up, deep etch

Shipping Charges: All shipping charge will be "cost incurred" A quote will be obtained and passed on as the freight charge. Standard shipping includes tailgate delivery: offloading NOT included. Consignee must have enough manpower on hand to unload crate(s) from deck of truck. Lift-gate and/or inside delivery are available for an additional charge on any shipment. Call or email for shipping quote at the time of your order.

Order Information

Standard Production Time: 6-8 weeks after receipt of signed art approval and/or payment, if applicable. (May be up to 12 weeks in the busy season)

Expedited Orders: Feel free to ask about a rush order, but please be advised that additional fees may apply.

Art Files: Please submit high quality vector or raster artwork whenever possible. Vector: .pdf, .eps, .svg

Raster: .tiff, .jpeg, .png (300 dpi preferred, the larger the better)

For files larger than 15mb, please contact us before hand and we can supply an upload option using our Dropbox.

Redraws: For original art, if suitable file cannot be provided, a redraw will be necessary. Simple art clean-up is included in our art service, but more complex projects, requiring several hours' work, will be subject to a redraw fee. We will advise before hand. While the final outcome of a redraw will be as close as possible, exact duplication of the original submission is not guaranteed.

Digital Renders: We are happy to provide one set of complimentary renders per potential order, within one business day.

Proofs & Revised Renders: Upon receipt of purchase order and suitable art file, a proof and render will be provided within one* business day. * If art requires redraw, please allow more time.

Color Fills: Art can vary in suitability for color filling, so please feel free to discuss with us. Color matching is available for an additional fee, but please know that though we will come as close as is possible, exact matches are not guaranteed.

Photoplates: For a graphic rich logo that cannot be adequately reproduced by etching, we offer the custom photoplate option. A permanent bond of a full color digital image to shaped glass, this option can reproduce finer details and an infinite color range. Not all art files will be suitable and the final outcome is based solely on the quality of the provided art file.

Approval: We want your client to take the time they need to get all their design choices just right, but please remember that no physical production will begin on an order until signed approval is received. Final ship date will be scheduled for 6-8 weeks after art approval. (May be up to 12 weeks in the busy season)

Final Art Files: We are happy to email you the final art files to forward to your clients for their own use.

Preshipment Information: When an order is approved and moving into production, we will send you preshipment details to forward to your client. They must review this carefully, then sign and return the Freight Services Form prior to their ship date.

Final Product Inspection: We inspect each piece of furniture prior to shipping, and will address any concerns with you right away. Occasionally the raw glass sourced to manufacture our products may contain small flecks and air bubbles. This is a naturally occurring by-product of the manufacturing process itself and is not considered a flaw or defect.

Shipping: All shipping charge will be "cost incurred" A quote will be obtained and passed on as the freight charge. Standard shipping includes tailgate delivery: offloading NOT included. Consignee must have enough manpower on hand to unload crate(s) from deck of truck. Lift-gate and/or inside delivery are available for an additional charge on any shipment. Call or email for shipping quote at the time of your order ■.

Proper Signing for Receipt of Shipment: Damage to crates or triggered teletip must be noted on BOL, followed by inspection of contents, with the driver present. Damaged goods are to be refused. If the driver is unwilling to wait, the shipment must be refused. If damaged goods are signed for and accepted, we may be unable to initiate a successful claim and would therefore be unable to provide a free replacement.
